

# Cybersecurity & AI Proposal for 12 Companies Using AI Chatbots for Customer Service 2025

---

This document outlines core services offered by CyForge, prepared specifically for **12 Companies Using AI Chatbots for Customer Service 2025**. We believe our expertise directly aligns with the challenges and opportunities in the **SaaS** industry.

**Analyzed Client Profile:** *Tidio is a customer experience platform that uses AI-powered chatbots for customer service, automating up to 70% of inquiries and reducing response times by 90%. The company's primary customers are likely small and medium-sized businesses looking to deliver seamless support and grow revenue.*

## Core Service Offerings

---

We provide a suite of advanced B2B solutions. Based on our analysis, the following services would provide the most immediate value to your operations:

- Here is the list of client-facing services mentioned in the provided text: AI Audits
- DevSecOps integration
- Copilot for business
- Enterprise-grade security features
- Premium Support
- Code Review
- Code Search
- Automate any workflow
- CI/CD
- App Modernization
- Compliance-as-a-Service

## Why CyForge?

---

We are not a generic vendor. We are a team of expert engineers who specialize in solving complex problems for high-growth companies. Unlike traditional consultants, we integrate directly with your team to deliver automated, observable, and hardened systems.

Our focus is on measurable outcomes, not just billable hours. We help our clients reduce compliance overhead, ship code faster, and secure their most critical assets.

## Next Steps

---

We would be happy to provide a complimentary 30-minute diagnostic call to discuss your specific technology stack and identify immediate areas for improvement. Please reply to the email from Eshan Jameel to schedule a time.
