

Cybersecurity & AI Proposal for Game-Ace: Game Development Company

This document outlines core services offered by CyForge, prepared specifically for **Game-Ace: Game Development Company**. We believe our expertise directly aligns with the challenges and opportunities in the **Gaming** industry.

Analyzed Client Profile: *Game-Ace is a custom game development company that specializes in turnkey game development services, AR/VR gaming, and game art creation, with expertise in Unity and Unreal Engine.*

Core Service Offerings

We provide a suite of advanced B2B solutions. Based on our analysis, the following services would provide the most immediate value to your operations:

- We help game studios scale with full-cycle development and co-dev support. From mobile to console
- we build performance-first games that win players and trust.

Why CyForge?

We are not a generic vendor. We are a team of expert engineers who specialize in solving complex problems for high-growth companies. Unlike traditional consultants, we integrate directly with your team to deliver automated, observable, and hardened systems.

Our focus is on measurable outcomes, not just billable hours. We help our clients reduce compliance overhead, ship code faster, and secure their most critical assets.

Next Steps

We would be happy to provide a complimentary 30-minute diagnostic call to discuss your specific technology stack and identify immediate areas for improvement. Please reply to the email from Eshan Jameel to schedule a time.
