

# Cybersecurity & AI Proposal for How these 10 companies are using AI for customer service

---

This document outlines core services offered by CyForge, prepared specifically for **How these 10 companies are using AI for customer service**. We believe our expertise directly aligns with the challenges and opportunities in the **Consulting** industry.

**Analyzed Client Profile:** Assembled is a company that provides AI-powered customer service solutions for businesses. Their primary customers are likely companies in the business process outsourcing (BPO) industry.

## Core Service Offerings

---

We provide a suite of advanced B2B solutions. Based on our analysis, the following services would provide the most immediate value to your operations:

- Here is the list of client-facing services mentioned in the provided text: AI Audits
- DevSecOps integration
- Copilot for business
- Enterprise-grade security features
- Premium Support
- Code Review
- Code Search
- Automate any workflow
- CI/CD
- App Modernization
- Compliance-as-a-Service

## **Why CyForge?**

---

We are not a generic vendor. We are a team of expert engineers who specialize in solving complex problems for high-growth companies. Unlike traditional consultants, we integrate directly with your team to deliver automated, observable, and hardened systems.

Our focus is on measurable outcomes, not just billable hours. We help our clients reduce compliance overhead, ship code faster, and secure their most critical assets.

## **Next Steps**

---

We would be happy to provide a complimentary 30-minute diagnostic call to discuss your specific technology stack and identify immediate areas for improvement. Please reply to the email from Eshan Jameel to schedule a time.
